

Emergency Contacts

1. Contact the Corps to determine any permitting requirements.

The roster for PMs and their assignments periodically changes. The latest contact information can also be found on our web site www.nws.usace.army.mil and click on the "Regulatory" link on the left side of the page.

- ***NOTE: Sometimes nws02 needs to be added in front of usace in the email addresses***

[Muffy Walker](#) - Branch Chief - (206) 764-6915 (day) / (206) 200-9954 (off hours)

North Application Review Section

- Kathy Kunz - Section Chief - (206) 764-3708(day)/ (206) 412- 7077 (off hours) kathleen.s.kunz@usace.army.mil
- Jonathan Smith- Snohomish - (206) 764-6904 (day) jonathan.smith@usace.army.mil
- Sue Powell- San Juan - (206) 764-5527 (day) susan.m.powell@usace.army.mil
- Amy Klein- King - (206) 766-6438 (day) amy.s.klein@usace.army.mil
- Randel Perry - Skagit/Whatcom and FERC/Special Assignment - (206) 764-6985 (day) randel.j.perry@usace.army.mil
- Vicky Didenhover -Island - (206) 764-3311 (day) vicky.l.didenhover@usace.army.mil
- Ann Uhrich-WRDA- (206) 764-6748 (day) ann.r.uhrich@usace.army.mil

(206) 764-6848 / (206) 764-6602 fax
william.d.abadie@usace.army.mil
-

1. Make sure you make a good faith effort to contact the Corps Regulatory Branch before proceeding with work, i.e., at least leave a voice mail and fax, the fax number for everyone located in the main office in Seattle is (206) 764-6602, whatever information you have available. If a permit is required and no contact was made, we could consider the work a knowing and willful violation.

2. Information to give the Corps - if you are unable to speak with someone directly, leave as much of the following information on voice mail and follow up with more details as soon as possible.

- Where the work is located (highway, river mile, nearest waterbody, nearest city, etc.)
- What work is being performed (replacement of lost riprap, bank protection, replacement of lost uplands, any large woody debris being placed, cleaning of a culvert, etc.)
- Include a discussion (amounts, location, etc.) of any temporary fill/work and when the material will be removed and how the area will be restored.
- How the work is being performed (clean excavation with backhoe, pushing of material with bulldozer, blasting out the culvert with water, etc.)
- If any of the proposed work is in wetlands or below the plane of ordinary high water (freshwater) or below the plane of mean higher high or mean high

water (tidal)

- Relationship of the proposed work to previously existing structures (replacing what previously existed or adding different structures, etc).
- Photos, if available, can often be very helpful
- Anything else that could help us to determine what is being proposed (reference previously issued permits for work at the site)
- Include what coordination with the NMFS/USFW (Services) for ESA/EFH has occurred.

3. Based on the information provided, the Corps will need to determine:

a. If the work will be replacing lost uplands after a catastrophic event - a

Corps permit is required

- Specifically, the Corps has jurisdiction over any activity involving the placement of fill material waterward of the current ordinary high water mark and in any water of the U.S. Thus, under current Corps regulations and policy, uplands that are lost as a result of storm, flood, or other discrete event may not be replaced without first contacting the Corps for a DA permit determination.

b. If the work will be replacing lost structures or structural fill, e.g., riprap, road fill, etc. **AND** the work is **only in Section 404** jurisdiction and the work is completed within 2 years of the unusual erosion event - exemption (323.4(a)(2)) may apply:

- Maintenance, including emergency reconstruction of recently damaged parts, of currently serviceable structures such as dikes, dams, levees, groins, riprap, breakwaters, causeways, bridge abutments or approaches, and transportation structures. Maintenance does not include any modification that changes the character, scope, or size of the original fill design. Emergency reconstruction must occur within a reasonable period of time after damage occurs in order to qualify for this exemption.
- The interpretation for "such as" is very narrow. If the structure being maintained is not one of those listed, the exemption does not cover the work.

c. If the work **can be authorized by a NWP** - fax PCN, issue the NWP - We need to make sure coordination with SHPO, Services, Wild and Scenic Rivers agency, etc. is completed or they, in writing, have agreed to after-the-fact consultation

d. If the work would require an **individual permit**, the Corps must follow the emergency procedures in 325.2(e)(4) including **required** coordination prior to work being performed in water of the U.S., with Northwest Division at Portland.

- **Division engineers are authorized** to approve special processing procedures in emergency situations. An "emergency" is a situation which would result in an unacceptable hazard to life, a significant loss of property, or an immediate, unforeseen, and significant economic hardship if corrective action requiring a permit is not undertaken within a time period less than the normal time needed to process the application under standard procedures. In emergency situations, the district engineer will explain the circumstances and recommend special procedures to the division engineer who will instruct the district engineer as to further processing of the application. **Even in an emergency situation, reasonable efforts will be made to receive comments from interested Federal, state, and local agencies and the affected public.** Also, notice of any special procedures authorized and their rationale is to be appropriately published as soon as practicable.
- We need to make sure coordination with SHPO, Services, Wild and Scenic Rivers agency, etc. is completed or they, in writing, have agreed to after-the-fact consultation
